

# LEVON KHORASANDZHIAN

Backend Developer | Java

Moscow, Russia | Open to onsite, hybrid, and remote roles

[lakhorasandzhyan@edu.hse.ru](mailto:lakhorasandzhyan@edu.hse.ru) | [t.me/yungflaeva](https://t.me/yungflaeva) | [+7 916 017-19-26](tel:+79160171926) | [github.com/lkhorasandzhian](https://github.com/lkhorasandzhian)

## EDUCATION

### Higher School of Economics

Moscow, Russia

*B.Sc. in Computer Science, Software Engineering*

*Aug 2021 – Jul 2025*

*M.Sc. in Computer Science, Data Engineering*

*Oct 2025 – Jul 2027*

**Relevant Coursework (GPA: 8.5/10):** Algorithms and Data Structures, Software Systems Architecture, C# Programming, Software Construction (Java), Distributed Databases and Data Warehouses, NoSQL Databases, Computer Architecture, Requirements Engineering, Software Development Tools, Software Quality Assurance and Testing

### Yandex Backend Development Summer School

Moscow, Russia

*Team business project “Advertising Campaign Auditor”*

*Jul 1 – Aug 31*

Built a service for Yandex Direct and Yandex Metrika that collects data from Direct and other sources, validates it against business rules, and returns detected issues with recommendations

## PROJECTS

### Product Catalog Service | *Java, Spring, PostgreSQL, Docker, Swagger, AOP, Web MVC*

Nov 2025

- Developed a REST API for a marketplace system with authentication, role-based access control, and authorization
- Implemented data storage using PostgreSQL with Docker-based containerization
- Documented API using Swagger and Javadoc
- Implemented cross-cutting concerns (logging, validation, security) using Spring AOP
- Evolved project across 5 iterations: from console app and servlets to full Spring MVC application

## TECHNICAL SKILLS

**Language:** Java

**Frameworks:** Spring Core, Web MVC, REST, Security, AOP

**Databases:** PostgreSQL, H2

**Tools:** Git, Docker, Docker Compose, Linux, Postman, Swagger, Javadoc

**Testing:** JUnit 5, Mockito

## LANGUAGES

**English:** B2

**Russian:** Native
