

LEVON KHORASANDZHIAN

Backend Developer | .NET / Java

Moscow, Russia | Open to onsite, hybrid, and remote roles

lakhorasandzhyan@edu.hse.ru | t.me/yungflaeva | [+7 916 017-19-26](tel:+79160171926) | github.com/lkhorasandzhian

EDUCATION

Higher School of Economics

Moscow, Russia

B.Sc. in Computer Science, Software Engineering

Aug 2021 – Jul 2025

M.Sc. in Computer Science, Data Engineering

Oct 2025 – Jul 2027

Relevant Coursework (GPA: 8.5/10): Algorithms and Data Structures, Software Systems Architecture, C# Programming, Software Construction (Java), Distributed Databases and Data Warehouses, NoSQL Databases, Computer Architecture, Requirements Engineering, Software Development Tools, Software Quality Assurance and Testing

PRACTICAL EXPERIENCE

Yandex Backend Development Summer School

Moscow, Russia

Team business project “Advertising Campaign Auditor”

Jul 1 – Aug 31, 2026

As a team, developed an advertising campaign audit service that aggregates data from Yandex Direct and Yandex Metrica, detects business rule violations, and generates recommendations. Designed the API and modular architecture and implemented external data integrations, error handling, logging, and tests for the core logic. At the final stage, the generated report is processed by a neural network model to improve the structure and readability of the recommendations

PROJECTS

Room Booking Service | C#, ASP.NET Core 10, PostgreSQL, Docker, Swagger, JWT, CI, Testing Apr 2026

- Built a REST API for meeting room booking with room management, availability schedules, slot generation, booking creation, cancellation, and admin booking overview
- Implemented JWT authentication and role-based access control for admin and user workflows
- Designed persistence layer using Entity Framework Core, PostgreSQL, migrations, and Docker Compose-based local infrastructure
- Implemented automatic 30-minute slot generation from room schedules and idempotent booking cancellation logic
- Covered core business flows with unit and integration tests using xUnit, FluentAssertions, and PostgreSQL Testcontainers
- Configured GitHub Actions CI pipeline to restore, build, run unit and integration tests, and execute load tests against PostgreSQL-backed API
- Added Swagger documentation, Makefile automation, database seed scripts, and NBomber load tests with latency and success-rate thresholds

Product Catalog Service | Java, Spring, PostgreSQL, Docker, Swagger, AOP, Web MVC

Nov 2025

- Developed a REST API for a marketplace system with authentication, role-based access control, and authorization
- Implemented data storage using PostgreSQL with Docker-based containerization
- Documented API using Swagger and Javadoc
- Implemented cross-cutting concerns (logging, validation, security) using Spring AOP
- Evolved project across 5 iterations: from console app and servlets to full Spring MVC application

TECHNICAL SKILLS

.NET: .NET Core, .NET Framework, ASP.NET, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework, Entity Framework Core, ADO.NET, LINQ, Dependency Injection

Java: Spring Framework, Spring Core, Spring Boot, Spring Data, Spring MVC, Spring Web, Spring Security, AOP, JDBC, JPA, ORM, Hibernate

Databases: PostgreSQL, MS SQL Server, MongoDB

Build Tools: Apache Maven, Gradle

Tools: Git, Docker, GitHub Actions, Linux, Postman, Swagger, Javadoc, Yandex Cloud

Testing: xUnit, FluentAssertions, Testcontainers, NBomber, JUnit 5, AssertJ, Mockito

LANGUAGES

English: B2

Russian: Native
